

Petaluma Fairgrounds Advisory Panel

First Report: Guiding Principles

5 July 2022

The following Guiding Principles were created and ranked by the 32 Panelists of the 2022 Petaluma Fairgrounds Advisory Panel. This report exclusively represents the words of Panelists themselves and the language below has not been edited by either City or Healthy Democracy staff. This explanatory text (in italics) is the only content contributed to this report by staff.

This project is a partnership between the City of Petaluma and Healthy Democracy. The Panel prepared these Principles as advice to City Council and the 4th District Agricultural Association to inform decision making about the future of the Sonoma-Marin Fairgrounds property. Panelists were randomly selected from across the city, to reflect a microcosm of the city in terms of age, gender, race/ethnicity, geographic location of residence, experience of a disability, housing status, and educational attainment.

The Principles below were written by the Panel after hearing from 14 informational presenters selected by the project's Informational Advisory Committee, seven presenters selected by the Panel from a menu prepared by the Informational Advisory Committee, and six members of the Informational Advisory Committee itself. The Panel also received briefing materials and contextualizing presentations from the City and Fair Board, reviewed stakeholder statements from the 14-member Informational Advisory Committee, hosted a 'Community Exchange' event with 50 members of the broader public, and reviewed results of an Equity Survey distributed to historically underrepresented communities in the Petaluma area. In addition – and of equal importance – the Panel explored the experiences of the cross-section of Petaluma residents on the Panel itself. The Panel met for a total of 49 ½ hours during this portion of the process. The Panel will meet for an additional 30 hours to develop its final recommendations for the property, which will be delivered to the City Council on July 11, 2022.

First Report: Guiding Principles

Additional Notes:

The Principles in this report were placed in order using a weighted score. This score was based on the votes submitted for each Principle by members of the Panel, according to this formula:

- *First a raw score was calculated:*
 - *A vote of "strongly agree" counted for 2 points toward the score of that Principle.*
 - *A vote of "somewhat agree" counted for 1 point.*
 - *A vote of "don't know / neutral" counted for 0 points.*
 - *A vote of "disagree" counted for -1 point.*
- *Then, a weighted score was calculated in this way:*
 - *The raw score / the number of votes cast for that Principle = the weighted score.*

Both the overall score and the specific votes have been noted with each Principle below. Ties were broken by a random number generator.

The Principles are numbered using the arbitrary numbers assigned to them during the process. Those assigned numbers are preserved here for ease of reference; they never represented any sort of ranking.

These Principles were developed specifically in relation to decision making about the Fairgrounds property. Panelist votes should not be interpreted as general agreement or disagreement with a value, but rather whether the Principle should specifically be applied to the Fairgrounds site (or not).

At the time of its first release, this report represents the votes of 30 Panelists out of the 32 total members of the Panel. The remaining two votes will be collected and published in an updated report no later than July 11, 2022.
